

HOW TO STORE INSULATION

Keep the product covered and fully wrapped on a pallet until required

A wrapped pallet with its hood free from damage, can be left outside when space inside is not available

Once the plastic hood has been removed keep all of the product inside and off the ground away from the elements

Product should be kept elevated on a pallet at all times to avoid sitting water

Product can become wet and damaged when exposed to the elements

Loose product is extremely likely to have water damage when left in the rain rendering your stock unfit for sale

This guidance is suitable for all KI products
