

# EARTHWOOL®

*the feel good glasswool insulation*

## DriTherm®: Brick Cavity Wall Insulation

Repels summer heat. Retains winter warmth.

### Summer

During the hot summer months, DriTherm Cavity slab will help to keep the inside of the house cool by restricting heat radiating in to the home from the outside brickwork.

### Winter

During the cool winter months, DriTherm Cavity slab will help to keep the inside of the house warm by reducing heat transfer from inside the home to the outside.

With DriTherm Cavity slab installed in the cavity, the external wall will not lose heat energy in the winter months or absorb heat energy in the summer months, in turn reducing demand on your energy use to maintain a constant and comfortable internal temperature.

## DriTherm®: Brick Cavity Wall Insulation

**Repels summer heat. Retains winter warmth.**

DriTherm Cavity slab is made using recycled glass and with ECOSE® Technology, a revolutionary binder that contains no added formaldehyde, phenols or acrylics and provides a tried and tested solution for masonry walls.

### Full fill

Fully fills the cavity to ensure high thermal performance. Product is also flexible to fit around wall imperfections.

### Fire Performance

DriTherm Cavity Slab is non-combustible and classified as Euroclass A1 to BS EN ISO 13501-1 – the highest possible.

### Thermal Performance

High thermal performance with a material R-Value of 1.4 m<sup>2</sup>K/W.

### Water Resistant

DriTherm Cavity Slab contains a water repellent additive to ensure that no liquid water is able to pass through the product and reach the inner leaf of masonry.

### Sustainability

DriTherm Cavity Slabs are manufactured with ECOSE® Technology which reduces embodied energy and delivers superior environmental sustainability compared to traditional glasswool products.

### BCA Compliant

DriTherm Cavity Slab is CodeMark certified, demonstrating that it meets the Building Code of Australia (BCA) requirements for the installation of insulation in a masonry brick cavity. Legislation requires building control authorities to accept CodeMark certified products and therefore gives contractors and specifiers absolute confidence in the products use.

### 50 Year Warranty

DriTherm Cavity Slab is guaranteed for 50 years to resist the passage of water from the outer to the inner leaf.
