

EARTHWOOL® GLASSWOOL

the feel good glasswool insulation

DriTherm® Premium Masonry Wall Insulation

Moisture resistant, thermal insulation

Summer and Winter

Lining the masonry wall with DriTherm Cavity slab will help to retain heat energy in the winter months and repel heat energy in the summer months, in turn reducing demand on your energy use to maintain a constant and comfortable internal temperature.

Moisture resistant

DriTherm Cavity slab resists the transmission of water, therefore it can be installed directly against the masonry or concrete wall without risk of the insulation absorbing any moisture.

EARTHWOOL® GLASSWOOL

the feel good glasswool insulation

DriTherm®: Premium Masonry Wall Insulation

Moisture resistant, thermal insulation

DriTherm Cavity slab is made using recycled glass and with ECOSE® Technology, a revolutionary binder that contains no added formaldehyde, phenols or acrylics. The silicone coated glasswool provides a tried and tested solution for masonry walls.

**30 years
proven performance
in UK homes**

In the wet and windy English climate, DriTherm Cavity slab has kept family homes comfortable for over 30 years.

**Thermal
Performance**

High thermal performance with a material R-Value of 1.5 m²K/W.

Sustainability

DriTherm Cavity slab is manufactured with ECOSE® Technology which reduces embodied energy and delivers superior environmental sustainability.

**Fire
Performance**

DriTherm Cavity slab is non-combustible and classified as Euroclass A1 to BS EN ISO 13501-1 – the highest possible.

**Water
Resistant**

DriTherm Cavity slab is silicone treated to resist the passage of water from the outer to the inner leaf.

50 Year Warranty

DriTherm Cavity slab comes with a 50 year warranty.

| DriTherm | Fineline | Thickness (mm) | R-Value (m ² K/W) | Length (mm) | Width (mm) | Area per pack (m ²) |
