LEED version 4.1.

PRODUCT DATA FOR CERTIFICATION

SUPAFIL BLOWING WOOL

LEEDv4.1 (Leadership in Energy and Environmental Design) is a voluntary standard that defines high performance green buildings which are healthier, more environmentally responsible, and more profitable structures. Credits for certification can be earned in various categories, each with a unique focus on sustainable design: sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation and design process.

KNAUF INSULATION products can put you on the right track for the highest result into the certification!

<table>

### PRODUCT DATA FOR CERTIFICATION

### SUPAFIL BLOWING WOOL

<table>
<thead>
<tr>
<th>LEED - Credit Category code</th>
<th>Definition</th>
<th>Knauf Insulation Products contribution</th>
<th>Contributes towards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Materials and Resources (MR) Building Product Disclosure and Optimization – Material Ingredients</td>
<td>To encourage the use of products where LCA is available and have environmentally, economically and socially preferable LCA. To reward project for which the products chemical ingredients are inventoried.</td>
<td>SUPAFIL products contains no ingredients listed on the REACH Authorization or Candidate list or Substances of Very High Concern. Supafil is certified DECLARE LBC Red List Free which means no harmful chemical substances.</td>
<td>1 point</td>
</tr>
<tr>
<td>Indoor Environmental Quality (EQ) Low-Emitting Materials</td>
<td>To reduce concentrations of chemical contaminants, as Volatile Organic Compound (VOC) that can damage air quality, human health, productivity and the environment. Emissions from ceilings, walls, thermal, and acoustic insulation are a complete category to be assessed.</td>
<td>SUPAFIL products are compliant with the German AgBB Testing and Evaluation Scheme and the higher category (A+) of the French labelling. The binder is without added phenol formaldehyde. Products with or without facing are certified for Indoor Air Comfort Eurofins Gold and Blue Angel.</td>
<td>3 points</td>
</tr>
<tr>
<td>Indoor Environmental Quality (EQ) Acoustic Performance</td>
<td>To provide spaces that promote occupants’ well-being, productivity and communication through effective acoustic design.</td>
<td>SUPAFIL products have high performance acoustic properties. Products increase sound insulation of building envelope, partitions, ceilings and aid in controlling reverberation time.</td>
<td>1 point</td>
</tr>
<tr>
<td>Indoor Environmental Quality (EQ) Thermal Comfort</td>
<td>To promote occupants productivity, comfort, and well-being by providing quality thermal comfort.</td>
<td>Insulation is a design alternative strategy. Heat radiation and air-conditioning will be minimized which will have positive comfortability feel and increase productivity for workers.</td>
<td>1 point</td>
</tr>
</tbody>

Annex 1: Materials and Resources: Sourcing of Raw Materials

Here below additional detailed information about pre-consumer waste (reintroduction of manufacturing scrap into another manufacturing process) and post-consumer waste (produced by the end consumer) utilized in the raw materials batch for the manufacturing of the Supafil mineral wool.

In LEED, total recycled content is the sum of 100% post-consumer recycled content plus 50% of the pre-consumer recycled content.

<table>
<thead>
<tr>
<th></th>

<td>58.7%</td>
<td>62.3%</td>
<td>79.5%</td>
</tr>
<tr>
<td>Total recycled content (100% pre-consumer+50% post-consumer)</td>
<td>65.6%</td>
<td>60.8%</td>
<td>63.1%</td>
<td>79.5%</td>
</tr>
</tbody>
</table>

LEED MR 4 contributes towards 2 points

Recycled content claims must conform to the definition ISO 14021-1999.

Pre-consumer waste: waste comes from process waste that is used to make a different product. This definition does not include in-house industrial scrap or trimmings, which are normally fed back into the same manufacturing process.

Post-consumer waste: waste which comes from curbside recycling programs (glass, plastic, paper, etc). Other postconsumer feedstock is generated when construction and demolition debris is recycled. To be a feedstock, the raw materials must have served a useful purpose in the consumer market before being used again.

LEED version 4.1.
PRODUCT DATA FOR CERTIFICATION
SUPAFIL BLOWING WOOL

SUPAFIL
(Loft, Thermoloft, Optiloft, Cavity, Timber Frame, Max Frame, CarbonPlus & Spray Blowing Wool)
Knauf Insulation

Final Assembly: Multiple Locations in Europe
Life Expectancy: Life of Structure Year(s)
End of Life Options: Salvageable/Reusable in its Entirety, Landfill

Ingredients:
Glass mineral wool: EC: 926-099-9 Man-Made Vitreous (silicate)
Fibers, Silicone: Siloxanes and Silicones, di-Me, Dust Oil:
Distillates (petroleum), solvent-dewaxed linseed taraffinic:
Antistatic Agent: Quaternary ammonium compounds, ethyltrimethylsiloxyl ethyl, Et sulfates

Living Building Challenge Criteria: Compliant
I-13 Red List:
- LBC Red List Free
- LBC Red List Approved

I-10 Interior Performance: AgBB Scheme French A+ 2011
I-14 Responsible Sourcing: Not Applicable

KNF-0040
EXP: 03 APR 2021
Original Issue Date: 2020

Annex 3: *Indoor Environmental Quality - Low-Emitting Materials*

Here below the Eurofins Indoor Air Comfort Gold Certificate for Blowing products:
LEED version 4.1.

PRODUCT DATA FOR CERTIFICATION

SUPAFIL BLOWING WOOL

Appendix to Certificate

IACG-323-01-33-2017

Knauf Insulation

receives the Indoor Air Comfort Gold certificate with validity 19 June 2022 for below product group, including subgroups and individual products listed in the following table:

<table>
<thead>
<tr>
<th>Product group</th>
<th>Production site</th>
</tr>
</thead>
<tbody>
<tr>
<td>Knauf Insulation Virgin Blowing Wool</td>
<td>Cambray, United Kingdom</td>
</tr>
<tr>
<td></td>
<td>Lannemezan, France</td>
</tr>
<tr>
<td>and Supafil</td>
<td>St Helene, United Kingdom</td>
</tr>
<tr>
<td></td>
<td>Vise, Belgium</td>
</tr>
</tbody>
</table>

The products in this group are based on identical or similar recipe and are produced under equivalent conditions. Grouping of the products and inspection of the production process is part of the Indoor Air Comfort Gold certification. A worst-case product, which is representative for the whole group, is being tested frequently.

LEED version 4.1.

PRODUCT DATA FOR CERTIFICATION

SUPAFIL BLOWING WOOL

Here below the Blue Engel Certificate for low-emission materials for Supafil products:

Supafil

Category: Low-Emission Thermal Insulation Material and Suspended Ceilings for Use in Buildings (until 12/2020) (DE-UZ 132)

Website: https://www.blaue-engel.de/en/products/construction-heating/thermal-insulation-material-indoor-until-12-2020/supafil

Currently there are no detailed product information provided by company.

Benefits to Environment and Health

1. low emissions
2. low pollutant content
3. no adverse impact on health in the living environment

For additional information please contact Sustainability@knaufinsulation.com
Annex 4: Indoor Environmental Quality – Sound Reduction Index Example for Supafil

STC in USA is composite Sound Transmissions Class and is equivalent to $R_w$ Sound Reduction Index in Europe. $\alpha$ coefficient is the coefficient for sound absorption.
